### About Me

I'm a passionate **MERN Stack Developer** with hands-on experience in building dynamic, responsive web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. I thrive in challenging environments where I can apply my problem-solving skills and continuously explore new technologies. With a strong foundation in full-stack development and real-world project experience, I aim to deliver scalable solutions and grow as a valuable contributor in the tech industry.

### Professional Experience

**EMED HEALTHTECH PRIVATE LIMITED**, *Frontend Developer* 2024 – Present

Key responsibilities:

- Developed and maintained dynamic React applications with reusable components, optimizing performance and enhancing user experience.
- Implemented responsive UI/UX designs using modern CSS frameworks (Tailwind, Bootstrap) and design tools, ensuring cross-browser compatibility.
- Integrated RESTful APIs and managed state efficiently using React Hooks, Context API, and Redux for seamless data flow.

**Ranpariya Lab L.L.P**, *As a Trainer* 2022 – 2023

Key responsibilities:

- Generated custom coding to create web page content that addresses organizational demand.
- Developed responsive pages and templates.
- Actively applies feedback received to day-to-day work and strives to improve performance.
- Testing of pages & finding bugs as soon as possible.

### Education Background

**Master of Information Technology & Computer Application**, *Saurashtra University, Rajkot* 2025

**Bachelor of Computer Application**, *Saurashtra University, Rajkot* 2023

## Skills

---

- Html & Css
- Javascript
- Bootstrap
- TailwindCss
- React Js
- Node Js
- Express Js
- MongoDB
- Github

## Projects

---

### Movie Mafia — Web Application [🔗](#)

- Built a dynamic movie web application using **Node.js**, **Express.js**, **EJS templating**, and **MongoDB**.
- Implemented **role-based authentication** with separate modules for admin and users.
- Admins can **add, update, and delete movies**, and manage categories efficiently using MongoDB.
- Designed a **responsive UI** and deployed the project on **Render** for live access.

### Tech Threads - Web Application [🔗](#)

- Developed a fully functional blog website using **Node.js**, **Express.js**, **MongoDB**, and **EJS templating**.
- Designed and implemented **separate modules for admin and client**, enabling role-based access.
- Admins can **create, edit, delete, and manage blog posts, categories, advertisements, and users**.
- Clients can **register/login, create their own blog posts, edit them, and explore other blogs through a clean, user-friendly interface**.
- Deployed the project on **Render** with a responsive UI for smooth cross-device experience.
